Data Limitations	YMP-provided NAD-27 northing/easting data for wells NC-EWDP-4PA, -4PB, -15D, and -15P were found to be incorrect, due to an incorrect transformation of the data from NAD-83 geographic (latitude/longitude). Documentation of this discovery and subsequent investigations are contained in (EWDP_location_problems_email_trail.pdf). The spreadsheet (TSG10010_EWDP_Position_Review.xls) contains an analysis of all EWDP locations surveyed by the YMP personnel. Only the locations for the wells listed above were found to be in error; these wells are highlighted in yellow in the spreadsheet. Corrected northing/easting values were inserted into the location document nye_ewdp2-a_REVISED.doc, posted to the nyecounty.com website as rid3698_01.pdf. In addition, an extraneous text file and spreadsheet were removed from RID3698.
