Title of Data	Inductively Coupled Plasma-Mass Spectrometry Results Reported by Desert Research Institute (Water Resource Center, Reno, NV) on March 5, 2001 to GMII for EWDP Water Samples (hydrogeochemistry)					
Description of Data	An MS Excel file (DRI05march01.xls) contains site names, sampling dates, GMII sample IDs, DRI laboratory numbers, pump depths, sample depths, and analytical data for 51 elements.					
Data Collection Method	Water from the discharge line of a down hole Bennett pump (after at least 3 well bore volumes of fluid discharged) was filtered through a 0.45 micron Geotech "dispos-a-filter," collected in a prerinsed 500 mL HDPE bottle, labeled in field, and shipped to laboratory from office.					
Data Location(s)	Nye County Early Warning Drilling Program well sites NC-EWDP-1S, -9SX, -03S, -4PA, -4PB, -5SB, -12PA, -12PB, -12PC, -19D, -19P, -15P, -1DX and -7S at specified depths.					
Data Collection Period(s)	11/8/1999 to 10/26/2000					
Data Source(s)	Original DRI-WRC analyses in RID 4081 and GMII field geochemistry notebook.					
Data Censuring	None					
Data Processing	Data reduction performed by laboratory; data compiled into spreadsheet for distribution by D.L. Shettel of GMII.					
Data Limitations	Water samples are confined to the screened interval of piezometer wells or the packed off interval of Westbay completions. Some analyses are below detection limit given in table (preceded by minus sign).
