Title of Data Major Anion, Cation and Selected Trace Element Analyses Reported by Desert Research Institute on January 14, 2000, to GMII for a Water Sample from EWDP-4PA (hydrogeochemistry)

Description of Data An MS Excel file (dri1710.xls) contains well name, sampling date, sampling interval, analytical results for analytes, laboratory sample ID, and GMII sample ID.

Data Collection Method Water samples were bailed with a large capacity disposable plastic bailer. Samples were then filtered through a 0.45 micron filter, collected in 500 mL high density polyethylene bottles, labeled in field, and shipped to laboratory from the office.

Data Location(s) Nye County Early Warning Drilling Program well site NC-EWDP-04pa at specified depth.

Data Collection Period(s) 1/9/2000

Data Source(s) Original laboratory analyses in RID 1710 and GMII field geochemistry notebook.

Data Censuring None

Data Processing Laboratory performed data reduction; data compiled into spreadsheet for distribution by D.L. Shettel of GMII.

Data Limitations Bailed water samples may not be as representative of aquifer as samples collected during post development well purging.
